Project Name	Smart Fashion Recommender Application

Building a Chatbot:

The screenshot shows the IBM Watson Assistant Lite interface for a shopping bot. The top bar includes 'IBM Watson Assistant Lite', 'Upgrade', 'Shopping Bot', and 'Learning center'. The main area is titled 'Customer starts with: Hai, I am looking for an Outfit'. Below this, the 'Conversation steps' are listed:

- Step 1: What Kind of Outfit are you Looking for? (Options: Ethnic, Western)
- Step 2: What Type of Western Wear you're Looking for? (Options: Dresses, Jumpsuits, +3)
- Step 3: Check Out this Striped Black and White Top from FOREVER 21 (Option: Confirmation)

On the right, the 'Customer starts with:' section provides instructions on how to enter phrases that a customer might use to start the conversation. It includes a list of phrases: 'outfit', 'Hai', 'Dress', and 'Hai, I am looking for an Outfit'. A 'Preview' button is visible at the bottom right.

The screenshot shows the IBM Watson Assistant Lite interface with a dialog box titled 'Include an image with your response'. The dialog box contains the following fields:

- Source URL: <https://samyakkimg.gumlet.io/catalog/product/h/e/...>
- Alt text (recommended): 53/60
- Title (Optional): 0/60
- Description (Optional): 0/250

An 'Image preview' section shows a woman wearing a blue and green patterned dress. The dialog box also includes 'Cancel' and 'Update' buttons. The background shows the same conversation steps as the previous screenshot.

Chatbot Integration Code:

```
<script>
window.watsonAssistantChatOptions = {
  integrationID: "3ac3d9ad-d8bf-45d2-a292-1f73a27aceed", // The ID of this integration.
  region: "au-syd", // The region your integration is hosted in.
  serviceInstanceID: "aafc4048-50e1-4aa2-a877-e2c9d66a1422", // The ID of your service instance.
  onLoad: function(instance) { instance.render(); }
};
setTimeout(function(){
  const t=document.createElement('script');
  t.src="https://web-chat.global.assistant.watson.appdomain.cloud/versions/" +
(window.watsonAssistantChatOptions.clientVersion || 'latest') + "/WatsonAssistantChatEntry.js";
  document.head.appendChild(t);
});
</script>
```

Integrate Chatbot to the HTML Page:
