

Assignment -4

Docker and Kubernetes

Assignment Date	21 October 2022
Student Name	SAMYUKTHA V
Student Roll Number	713319CS124
Maximum Marks	2 Marks

1.Pull an image from docker hub and run it in docker Playground

The screenshot displays two browser windows. The top window shows the Docker Hub page for the repository `uifd/ui-for-docker`. The page indicates it is deprecated and suggests using Portainer. A 'Docker Pull Command' box shows the command: `docker pull uifd/ui-for-docker`.

The bottom window shows the Docker Playground interface. It displays the instance name `cd9an2u3_cd9av060qau0008hbjso` with IP `192.168.0.13`. The terminal output shows the following commands and results:

```
# This is a sandbox environment. Using personal credentials #
# is HIGHLY! discouraged. Any consequences of doing so are #
# completely the user's responsibilities. #
# The PWD team. #
#####
[models] (local) root@192.168.0.13 ~
$ docker pull uifd/ui-for-docker
Using default tag: latest

```

2. Create a docker file for the job portal application and deploy it in Docker desktop application

The image displays two screenshots of the 'UI For Docker' web application interface, accessed via a browser. The browser's address bar shows the URL: `ip172-18-0-4-cd9an2u3tccg00fgf6k0-9000.direct.labs.play-with-docker.com/#/`.

Top Screenshot:

- Navigation Bar:** Includes links for Dashboard, Containers, Containers Network, Images, Networks, Volumes, and Info. A 'Refresh' button is on the right.
- Main Header:** 'UI For Docker' with the subtitle 'The UI for Docker container engine' and a 'Learn more.' button.
- Running Containers:** A list showing one container named 'beautiful_goldwasser' with a status of 'Up About a minute'.
- Status:** A large green donut chart indicating 100% of containers are running.

Bottom Screenshot:

- Running Containers:** Same as the top screenshot, showing 'beautiful_goldwasser' is running.
- Status:** The donut chart is more detailed, showing a legend for 'Running' (green), 'Stopped' (red), and 'Ghost' (grey).
- Containers created:** A line graph showing the number of containers created over time. The y-axis ranges from 0 to 1, and the x-axis shows the date '21/10/2022'. The line is at 1.
- Images created:** A line graph showing the number of images created over time. The y-axis ranges from 0 to 1, and the x-axis shows the date '21/10/2022'. The line is at 1.

3. Create an IBM container registry and deploy hello word app

The screenshot displays the Docker Desktop interface. The top pane shows the build process of a container image, with a progress bar on the right indicating the percentage of the build completed. The bottom pane shows the 'Images on disk' section, which lists the built image 'job-portal-main' with a tag of 'latest' and a size of 1.08 GB. The interface also includes a sidebar with navigation options like 'Containers', 'Images', 'Volumes', and 'Dev Environments'. The bottom status bar shows system information like RAM (2.53 GB), CPU (1.56%), and connection to the Hub.

```
